

ULTREYA SCALLOPS SCHEME

This data sheet details how we calculate a number of Ultraya Scallops for each hotel and restaurants we deal with. It shows a list of facilities and services we deem add value to our tours with an importance coefficient. The sum of these coefficient adds to 100 and the score received by the hotel decides their ranking.

Based on the score received by each provider we will allocate them 1 to 5 Scallops based on the quality of the service and facilities they provide. The amount of Scallop determines how we will deal with the provider as below:

- 0 to 20 pts 1 Ultraya Scallop we do not wish to work with this provider
- 20 to 40 pts 2 Ultraya Scallops unless forced by limited availability we will not offer this provider
- 40 to 60 pts 3 Ultraya Scallops booked if no other provider with better score is available
- 60 to 80 pts 4 Ultraya Scallops our ideal providers
- 80 to 100 pts 5 Ultraya Scallops provider of exception
